¹See Appendix II, B. This note was printed in the lower left side of a 12-subject sheet with five \$5 notes, five \$10 notes and \$100 note.

²Because these notes were payable on July 25, 1863, the bankers hoarded the \$50 and, to a lesser degree, the \$100 notes, while circulating the 5's, 10's and 20's. Thus, there are a disproportionately large number of \$50 and \$100 notes in choice condition today.
